Perspective Charts

Table of Contents

The Filters

Contract Types and Biennium filters: from the dropdown list pick which values you want included in the charts. To include all values check the Select All box at the bottom of the popup window. Click Apply to refresh the charts. Click Cancel to close the window without refreshing the charts.

Infrastructure and Recovery Act filters: Choices for each filter are All, Yes and No.

Infrastructure	Recovery Act	Results Include
All	All	All contracts
All	Yes	All Recovery Act contracts
All	No	All contracts, excluding Recovery Act
Yes	All	All infrastructure contracts
Yes	Yes	Contracts that are both Recovery Act and infrastructure
Yes	No	Infrastructure contracts that are not Recovery Act contracts
No	All	All contracts, excluding infrastructure
No	Yes	Recovery Act contracts that are not infrastructure
No	No	Contracts that are not infrastructure, and not Recovery Act

Recovery Act contracts are funded by the American Recovery and Re-Investment Act

Infrastructure contracts support improvements to public infrastructure, such as: water, wastewater, storm water, utilities, transportation, ports, and community buildings. Though we consider housing an important element of the broad definition of infrastructure, housing will not be flagged under this definition.

How the Combo Charts Work

Combo pages include a summary grid and bar chart and a pie chart. The summary grid controls the filtering for the charts. If you click on a row in the grid the charts display data based on that row. Hover over a bar or a pie section to see more information. Additionally you can click on a section of the pie to see details about that section. The pie chart defaults to the first row of the gird. The bar chart defaults to all the contracts included in the grid.
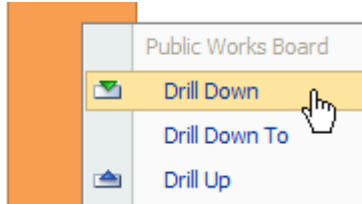

Purpose Group Combo

Grid is summarized by purpose group. Purpose group data is based on primary purpose assigned to each contract. Follow this link for Purpose Group definitions.   The hierarchy for drilling down through the bar and pie charts is Purpose Group, Division then Program.

Division Combo

The hierarchy for drilling down through the charts is Division, Purpose Group then Purpose. Grid is summarized by Division. Purpose group data is based on primary purpose assigned to each contract. Follow this link for Purpose and Purpose Group definitions.

Purpose Drilldown

This bar chart summarizes data by purpose group. The bar chart has drill through capabilities. The hierarchy for drilling down through the charts is Purpose Group, Purpose, Division then Program. Click on a bar and the chart will display the next level in the hierarchy. Alternatively, right click on the bar and select Drill Down from the menu.

. To drill back up right click on the bar then select Drill Up. To quickly start over,

refresh your browser.

County

This bar chart summarizes contract amounts by county. Contract dollars are distributed based on the benefitting jurisdiction amounts entered for each contract.

Legislative District

This bar chart summarizes contract amounts by legislative district. To determine legislative district amounts, the benefitting jurisdiction amounts for each contract are evenly distributed to each district within the jurisdiction. Here's an example of how the proration works for a contract benefitting Thurston County:

In this case the amount for each legislative district is $1,000 and the amount for each congressional district is $2,000.

Congressional District

This bar chart summarizes contract amounts by congressional district. To determine congressional district amounts, the benefitting jurisdiction amounts for each contract are evenly distributed to each district within the jurisdiction. See the example, above, of how the proration works for a contract benefitting Thurston County.
